

Prince George's Forensic Lab Testimonial

“Artisan Partners provided us with invaluable construction management services in the completion of a build-to-suit for the new forensic laboratory facility for Prince George's County, Md. The 35,000-square-foot build out was a technically-specific project and Artisan oversaw every step of the construction process -- design, permitting, contracting, and completion -- in expert fashion.

We would give our highest recommendation for Artisan on similar and other construction management assignments.”
